

Summary

Aspiring frontend developer with MERN stack certification, proficient in building responsive web applications using React.js, Bootstrap, and REST APIs. Dedicated to contributing to meaningful projects while expanding my front-end skills through internships and jobs.

Skills

- Front-end development
- Javascript
- React.js Frameworks
- RESTful APIs
- API integration
- Bootstrap Frameworks

Experience

Fresher

Projects

ShopEasy – E-Commerce Web Application

1. Tech Stack: React.js, Responsive Web Design, REST APIs

- Developed a modern e-commerce platform focused on enhancing user experience with a streamlined and intuitive interface.
- Implemented user-friendly navigation with clearly structured Home, Products, and Checkout sections.
- Integrated shopping cart functionality displaying real-time item count.
- Designed a featured products section with pricing and “Add to Cart” options.
- Ensured responsive design for seamless compatibility across mobile and desktop devices.
